DETAILED ACTION

Response to Amendment

1. The amendment filed on 06/10/08 has been made of record and entered. Claim 1 has been amended. Claims 2-3 have been canceled. Claims 12-13 have been added.

Claims 1 & 4-11 are currently pending in this application.

Status of Withdrawn Claim(s)

2. Claims 8-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 10/11/07.

Claim Objections

3. Claim 4 is objected to because of the following informalities:
- A. In line 2, "used" should be deleted.
 - B. In the last line, "a mixture" should be changed to --mixtures--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102(e)

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1793

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 4-5, 7, & 12-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Fischer et al., hereinafter referred to as "Fischer '800", (US Pat. 6,730,800 B2).

Fischer '800 discloses a catalyst comprising <80% by weight of CuO and >20% by weight of an oxidic support, etc. (see col.13, claim 1). The shaped catalyst body has a pore volume of 0.01 ml/g for pore diameter of >50 nm (see col. 14, claim 14). The ratio of macropores having a diameter of >50 nm to the total pore volume for pores having a diameter of >4 nm in the shaped catalyst body is >10% (see col. 14, claim 15). See entire reference for further details.

There is no patentable distinction seen between the claimed catalyst and that disclosed by Fischer '800. Thus, the claims are anticipated by the reference.

The applied reference has common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the

Art Unit: 1793

inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Allowable Subject Matter

5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Applicants’ Arguments

6. Applicants’ remarks filed on 06/10/08 has been carefully considered, but not deemed persuasive in view of the new ground of rejection(s) and/or objection(s) above.

Conclusion

7. Claims 1 & 4-13 are pending. Claims 1, 4-5, 7, & 12-13 are rejected. Claim 6 is objected. Claims 8-11 are withdrawn due to nonelected (distinct) invention(s). No claims are allowed.
